25X1 2. [redacted] Comment. Motor vehicle [redacted] indicates that the shipment on 7 September was a rocket launcher unit of the Fourth Gds Mecz Army. Train [redacted] on 9 September is believed to have carried a signal unit of the 1st Mecz Div. [redacted] date of arrival lead to the conclusion that the unit returned from the command-post exercise in the area of Mecklenburg. A tank unit of the 1st Mecz Div, which possibly came from Neustrelitz, has presumably been unloaded from the tank shipment on 9 September.

25X1A 3. [redacted] Comment. The strengths of occupation at Doeberitz are subject to fluctuations resultant from continuous exercises at the garrison troop training grounds. However, compared with a report of early September [redacted] no essential changes appear to have occurred in the occupation of the installations by units of the 1st Mecz Div. The special motor vehicle on sketch A attached as Annex 1 has presumably been observed with a column of the 18th (?) Eagr Bn of the division. The insignia on sketch B, worn by soldiers in Altes Lager, are reported for the first time. Colonel Ignatovich (fnu) and Major Maksim (fnu) are also reported for the first time.
